

Medipro® Detergent Sanitiser Tablets

- Recommended by leading infection control experts worldwide.
- Compact to store and transport - reduce storage and transport costs.
- Chlorine is effective against virtually all known bacteria, viruses and spores.
- Less toxic and less corrosive than other chlorine compounds.
- Medipro DST 2-in-1 action disinfects and cleans.
- Safe to handle and store - no spillages or leaks.
- Fast dissolving and ready to use in under 5 minutes.
- Tablets can be stored for up to 5 years and will still yield the stated minimum chlorine level if stored correctly.

medipro

Our detergent tablets have all the benefit of our effervescent chlorine tablets, but we added detergent. They provide an effective solution to clean and disinfect in one operation. Medipro Detergent Sanitiser Tablets contain NaDCC together with a low foaming anionic surfactant.

Replaces liquid Bleach

In the Health Institutions and Local Government where a number of authorities have banned the use of liquid bleach, NaDCC powders and tablet formulations are the favoured method of chlorine disinfection.

Economic

Tablets provide an easy to use dilution system that eradicates over- dosing commonly associated with liquids and powders and more importantly, minimises under-dosing potential.

Greater Biocidal Effect

Strength for strength, tablets are more biocidal than liquid bleach because of their pH effect. The amount of chlorine required to kill the same number of bacteria increases if the pH is high.

Certified

Medipro Effervescent Chlorine Tablets are certified with test standards: BS: EN1276, BS: EN1650, BS: EN13704 & BS: EN13697. Other standards can be tested upon request.

Effective

Medipro Effervescent Chlorine Tablet solutions are fast acting and have a complete spectrum of biocidal activity. Bacteria, bacterial spores, algae, fungi, protozoa and viruses are sensitive to their effects.

Environmental

Reduces the amount of single-use plastics. It doesn't lock up vast quantities of water in warehouses, on shelves and vehicles travelling around the world. Its tablet format is easier to transport and therefore means fewer carbon emissions.

Safe

Tablets do not spill, splash or leak and exhibit a near neutral pH of c.6.5. which means reduced risk of accident or personal injury.

Available in the following formats:

Product code	NaDCC weight	Tablets per pot	Case size	Format
MCT325	1.7g	200	6	Pot

Heritage

Established in 1973, the manufacturers are a global leader in the manufacture of Chlorine (NaDCC) Tablets. These tablets have applications in a wide range of markets from Surface Disinfection to Water Purification and Baby Bottle Sterilising. An established authority in the fields of surface disinfection and water purification, we operate across 60 countries around the world, partnering with high profile, non-profit organisations, countless market-leading healthcare institutions and the NHS. Along with our own brands, we also contract manufacture own label products for some of the world's most prominent companies in the field of professional hygiene.
